

University Program

Paola Paris
Wind River Italy

What is University Program

- **Wind River's University Program allows colleges and universities to use Wind River's state-of-the-art device software development tools**
- **Donated licenses are for nonprofit, educational use only. They may be used in the following:**
 - **Courses that teach embedded systems concepts**
 - **Graduate and undergraduate projects for various engineering and non-engineering courses**
 - **Academic research activities where research results are publicly available**
 - **Graduate student theses**

What Wind River products are available

- **Wind River Software is available in object format only**
 - This does not apply for Linux Platforms
- **Wind River hardware can be purchased through the University Program at an educational discount**
- **Online Support - Web-based Support**

SUMMARY

The University

Educational institutions now have access to state-of-the-art technology commonly used by industry

The Student

With knowledge and experience using state-of-the-art technology, students have the opportunity to experiment and learn valuable industry experience before graduation

Our Customers

Easier to hire staff with industry experience (it takes between 6 to 18 months of training/mentoring before a new staff member is fully contributing to product development)
